

**PRODUCT RANGE OVERVIEW**

Commercial cladding can create attractive elevations with wide design permutations that blend into the surrounding architecture, enabling containers to be sited in planning sensitive areas.

ContainerClad offer a vast range of patterns, colours and textures. Optical formats can be tailor-made to reflect traditional brick, stonechip, timber or slate facades. In addition, a roof apex can be created on the steel structure and lightweight roofing tile installed to enhance aesthetic compatibility.

BRICK-EFFECT	rustika	anthrazit	ziegelrot	
	STONECHIP-EFFECT	aqua	bordeaux	granit
	LAMINATE-EFFECT	brushed-silver	grey-green	light-hardwood
WEATHERBOARD	dark-grey	light-oak	pine-green	
	IMITATION TIMBER	akazie	dunkelgruen	golden-oak
STONE-EFFECT	anthrazit	marmoweiss	zeigrot	
	NATURAL RIVEN STONE	graphite	light-stone	salmon

### METROLINK EXTENSION

ContainerClad are currently working on a Metrolink extension, which will reduce traffic in busy areas, and improve the quality of public transport. In order to supply and upgrade power supply systems, electrical Substations in the form of container modules need to be sited in both urban and rural locations along the route of the new track. However, the visual aesthetics of the steel containers had raised concerns with local Councils.

### CONTAINERCLAD SOLUTION:

ContainerClad have offered a unique solution to stringent Planning requirements, by ensuring that the Substations blend seamlessly with the surrounding architecture across a wide spectrum of landscapes. The application of cladding

coordinated to local building materials and textures, has ensured that sophisticated electrical equipment can be located as required, whilst the unique **ContainerClad Fixing System** maintains the integrity of the protective modules.
