SIKA REGISTERED CONTRACTOR SCHEME FOR SikaTack® Panel System

KEY BENEFITS OF USING A REGISTERED SikaTack® CONTRACTOR	
Peace of Mind	By selecting a Sika Registered Contractor you can be assured of a high quality installation
Guarantee	Only a Sika Registered Contractor can offer a Sika product guarantee
Qualified	All scheme members are independently assessed for financial stability, a sound trading history including good project references, a skilled workforce and a commitment to all health and safety legislation
Quality Control	At the Sika Training Academy contractor operatives and supervisors are shown the correct way to install the SikaTack® Panel System and this is followed up with on-site assessments of the operatives and supervisors to check their site practises prior to accreditation, to ensure competency of the operative is satisfactory
Safety	Proven commitment to safety, health and the environment must be demonstrated, Sika insists on health and safety, quality, training and environmental policies to be in place and proven prior to acceptance

SIKA - YOUR RAIN SCREEN CLADDING PARTNER SikaTack® Secret Fix Panel Adhesive System

The SikaTack® Panel Registered Contractor scheme has been introduced by Sika Ltd in response to an on-going requirement to ensure that the installation of site applied structural adhesive systems, such as the SikaTack® Panel System are correctly installed and used in accordance with a robust and integral design process. The identification and recruitment of experienced specialist building envelope and rainscreen cladding contractors is the defining aspect of the scheme. Only specialist contractors with the necessary relevant experience and who operate a fully functioning quality management system are allowed to apply. These specialist partners share Sika's desire to offer their clients a quality, value for money service both now and in the long term..

NATIONAL NETWORK OF CLADDING INSTALLATION EXPERTS

When specifying and selecting installation companies for our secret fix SikaTack® Panel Adhesive system, Sika recommend the use of our Registered Contractor Scheme. Made up of audited Specialist Cladding contractors based throughout the UK, this scheme has been developed to provide total quality control from manufacturing to installation, giving clients complete peace on every project.

GUARANTEED QUALITY

With materials guaranteed by Sika and the installation carried out by experienced approved registered contractors guaranteed, this gives peace of mind to owners, clients, specifiers and main contractors who will benefit from an exceptional product and installation warranty.

To ensure integrity, entry to our scheme is stringent with only the most skilled and reliable specialist companies achieving accreditation. All Registered Contractors have received full training from us in all application techniques in order to help them meet our standards.

SIKA REGISTERED CONTRACTOR SCHEME FOR SikaTack® Panel System

ContainerClad is a specialist Cladding company, with over 20 years experience in this field. We are registered Cladding installers for the Sikatack bonded fixing system and also many of the leading Cladding manufacturers. We have undertaken small and large-scale contracts, such as City School, Sheffield, as illustrated, which uses the Siktack panel adhesive fixing system with Steni colour Cladding.

Containerclad have also invested in Research & Development in order to think outside the box and solve planning problems encountered at Manchester Tram. Where specialist electrical equipment Containers needed to blend in with surrounding architecture, Containerclad invented their own unique fixing system to enable brick-pattern Cladding to be fixed without piercing the fabric of the steel Containers. This method can also be used on pre-cast concrete structures.
